BETE ENABLES 3D SPRAY NOZZLE DOWNLOADS FOR ENGINEERS

“THIS IS A VALUE-ADD FOR OUR CUSTOMERS. IT MAKES IT EASIER FOR THEM TO TEST THE SOLUTION IN THEIR SOFTWARE AND MAKE SURE THAT IT FITS WELL INTO THEIR DESIGN”

Engineers and designers can customize the exact 3D CAD model they need while the configurator builds their product on-the-fly. And with over 100 CAD formats and versions available, customers can always download parts natively into their application. BETE also offers free interactive product data sheets – downloadable PDFs – which engineers can share with their purchasing department and BETE for a streamlined quoting process.
